Sprinkler Guard For K8.0(115)

Model : BL SG / BL SS / BL SGS

Description:

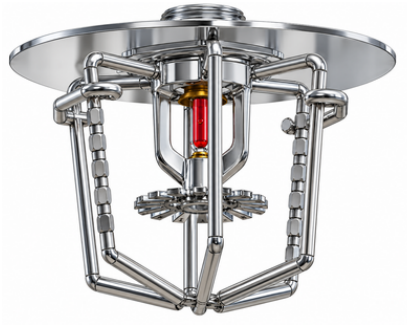

The Sprinkler Guard with Shield is designed to protect pendant and upright sprinklers from mechanical damage and physical impact. It is recommended for installations where sprinklers may be exposed to accidental contact, particularly in rack storage areas and other environments requiring additional protection.

The integrated shield provides protection against water discharge from sprinklers installed at higher elevations, helping to minimise interference with the operation of intermediate-level sprinklers. When installed with compatible sprinklers, the assembly is intended for use in fire protection systems designed in accordance with applicable installation standards.

Manufactured from welded carbon steel with a zinc-chromate finish, the sprinkler guard offers durable construction for demanding fire protection applications. The BL SG / BL SS / BL SGS models are UL Listed when used with BL 5611 / BL 5612 / BL 5613 / BL 5614 sprinklers. Installation and maintenance must comply with the manufacturer's instructions, applicable NFPA standards, and the requirements of the relevant authorities having jurisdiction.

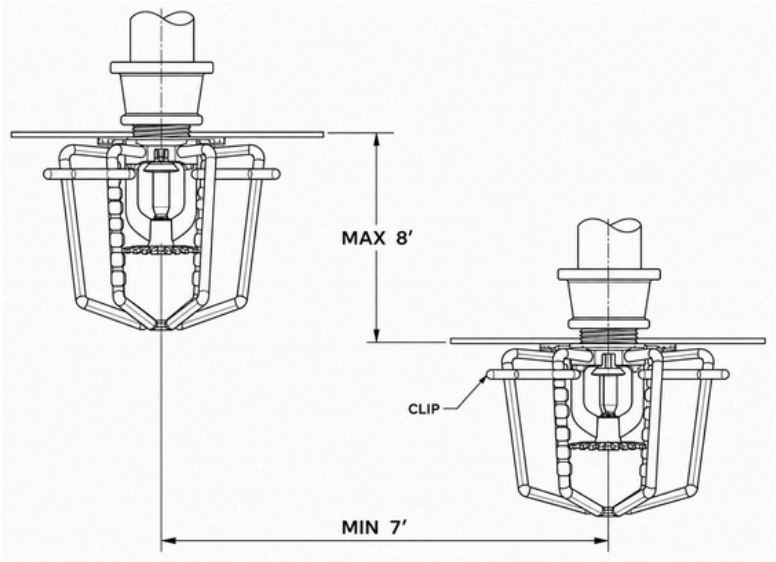

Specifications :

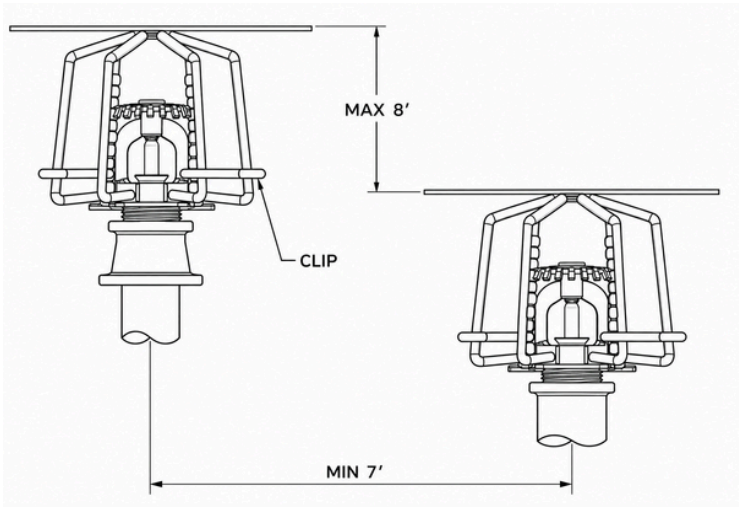

Models	
BL SG	Sprinkler Guard
BL SS	Sprinkler Shield
BL SGS	Sprinkler Guard with Shield
Approvals	UL Listed, When used with BL 5611 / BL 5612 / BL 5613 / BL 5614
Finish	Chrome

Installation :
