Sprinkler Guard For K5.6(80) / K11.2(160)

Model : BL SG / BL SS / BL SGS

Description:

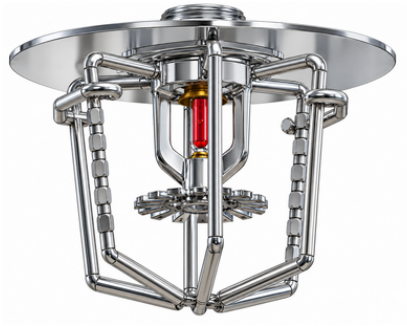

The Sprinkler Guard with Shield is designed to protect pendant and upright sprinklers from mechanical damage and physical impact. It is recommended for installations where sprinklers may be exposed to accidental contact, particularly in rack storage areas and other environments requiring additional protection.

The integrated shield provides protection against water discharge from sprinklers installed at higher elevations, helping to minimise interference with the operation of intermediate-level sprinklers. When installed with compatible sprinklers, the assembly is intended for use in fire protection systems designed in accordance with applicable installation standards.

Manufactured from welded carbon steel with a zinc-chromate finish, the guard provides durable protection for fire sprinkler installations. The BL SG, BL SS and BL SGS models are designed for use with BL 5601, BL 5602, BL 5603, BL 5604, BL 5621, BL 5622, BL 5623 and BL 5624 sprinklers, as applicable. Installation and maintenance must comply with the manufacturer's instructions, relevant NFPA standards and the requirements of the applicable authorities having jurisdiction.

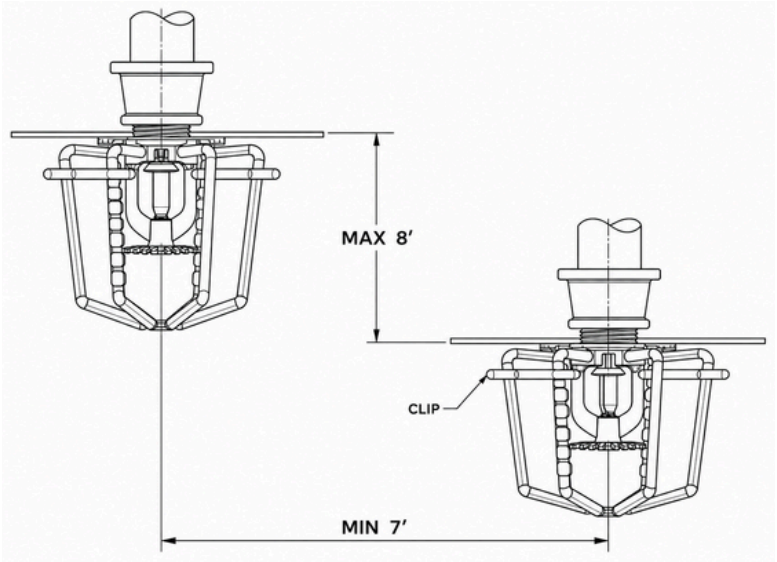

Specifications :

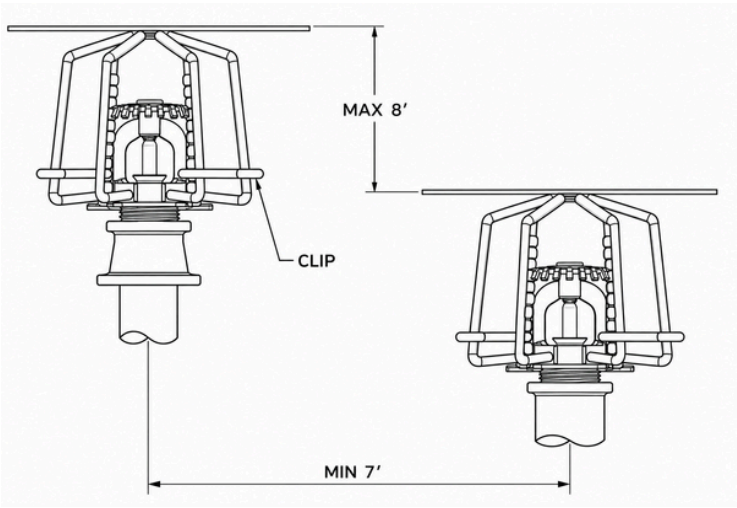

Models	
BL SG	Sprinkler Guard
BL SS	Sprinkler Shield
BL SGS	Sprinkler Guard with Shield
Compatible With	BL 5601, BL 5602, BL 5603, BL 5604, BL 5621, BL 5622, BL 5623 and BL 5624
Finish	Chrome

Installation :

BLAZETECH SYSTEMS LTD.
